

StuDen REST API Contract — V1.1

Updated V1.0 API Contract

Base URL: /api/v1 **Format:** JSON **Authentication:** JWT Bearer

1. Authentication

Register

POST /api/v1/auth/register

Login

POST /api/v1/auth/login

Current User

GET /api/v1/users/me

Update Current User

PUT /api/v1/users/me

Public User Profile

GET /api/v1/users/{userId}

Registration validates full name, email and password; email must be unique; passwords are hashed and never returned. Login returns a JWT access token. Protected endpoints require Authorization: Bearer .

2. Student Portfolio

Create

POST /api/v1/portfolio

Get My Portfolio

GET /api/v1/portfolio/me

Update

PUT /api/v1/portfolio/me

Delete/Deactivate

DELETE /api/v1/portfolio/me

A user can have one primary StudentPortfolio. Portfolio ownership is derived from the authenticated user.

3. Skills

GET /api/v1/skills

GET /api/v1/skills?categoryId={id}

GET /api/v1/skills/search?q={query}

GET /api/v1/users/me/skills

POST /api/v1/users/me/skills

DELETE /api/v1/users/me/skills/{skillId}

Skills are controlled by StuDen. Examples may include development, design, tutoring, music, dance, crocheting, modelling and other creative/practical skills.

4. Categories

GET /api/v1/categories

Categories may include Development, Design, Video & Content, Photography, Music, Dance, Tutoring, Fitness, Event Services and Creative & Professional Services.

5. Education

```
GET /api/v1/users/me/education
POST /api/v1/users/me/education
PUT /api/v1/users/me/education/{educationId}
DELETE /api/v1/users/me/education/{educationId}
```

6. Certificates

```
GET /api/v1/users/me/certificates
POST /api/v1/users/me/certificates
PUT /api/v1/users/me/certificates/{certificateId}
DELETE /api/v1/users/me/certificates/{certificateId}
```

7. Showcase

Showcase supports evidence of previous work, including images, videos, descriptions and external links.

```
GET /api/v1/users/{userId}/showcase
GET /api/v1/users/me/showcase
POST /api/v1/users/me/showcase
PUT /api/v1/users/me/showcase/{itemId}
DELETE /api/v1/users/me/showcase/{itemId}
PATCH /api/v1/users/me/showcase/reorder
```

8. Services

```
GET /api/v1/services
GET /api/v1/services/{serviceId}
POST /api/v1/services
PUT /api/v1/services/{serviceId}
PATCH /api/v1/services/{serviceId}/pause
PATCH /api/v1/services/{serviceId}/publish
DELETE /api/v1/services/{serviceId}
```

Search/filtering may use query parameters such as search, categoryId, skillId, minPrice, maxPrice, serviceMode and location. Only authenticated users with a StudentPortfolio can create services.

9. Service Images

```
POST /api/v1/services/{serviceId}/images
DELETE /api/v1/services/{serviceId}/images/{imageId}
```

Image upload uses multipart/form-data.

10. Saved Services

```
POST /api/v1/services/{serviceId}/save
DELETE /api/v1/services/{serviceId}/save
GET /api/v1/users/me/saved-services
```

11. Booking Requests

V1 uses booking requests instead of platform payments or orders.

```
POST /api/v1/booking-requests
GET /api/v1/booking-requests/sent
GET /api/v1/booking-requests/received
GET /api/v1/booking-requests/{requestId}
```

```
PATCH /api/v1/booking-requests/{requestId}/accept
PATCH /api/v1/booking-requests/{requestId}/decline
PATCH /api/v1/booking-requests/{requestId}/cancel
PATCH /api/v1/booking-requests/{requestId}/complete
```

Completing a request only changes its status in V1; no payment is triggered.

12. Booking Attachments

```
POST /api/v1/booking-requests/{requestId}/attachments
```

13. Conversations and Messages

```
GET /api/v1/conversations
GET /api/v1/conversations/{conversationId}
POST /api/v1/conversations
GET /api/v1/conversations/{conversationId}/messages
POST /api/v1/conversations/{conversationId}/messages
POST /api/v1/conversations/{conversationId}/messages/attachment
PATCH /api/v1/messages/{messageId}/read
```

14. Notifications

```
GET /api/v1/notifications
PATCH /api/v1/notifications/{notificationId}/read
PATCH /api/v1/notifications/read-all
```

15. Reports

```
POST /api/v1/reports
```

16. Admin APIs

```
GET /api/v1/admin/users
GET /api/v1/admin/users/{userId}
PATCH /api/v1/admin/users/{userId}/suspend
PATCH /api/v1/admin/users/{userId}/activate
GET /api/v1/admin/services
DELETE /api/v1/admin/services/{serviceId}
GET /api/v1/admin/reports
PATCH /api/v1/admin/reports/{reportId}/resolve
```

17. NEW — Public Shareable Student Profile

When a student creates a StudentPortfolio, StuDen generates a public shareable profile identity. The public profile is designed for sharing on LinkedIn, WhatsApp, Instagram, resumes and other channels.

17.1 Public Profile

```
GET /api/v1/public/profiles/{slug}
```

Authentication is not required. Returns only public profile information.

Recommended response shape:

```
{ "slug": "vivek-rao", "profileUrl": "https://studen.app/u/vivek-rao", "fullName": "Vivek Rao",
  "profileImageUrl": "...", "headline": "Full Stack Developer", "about": "...", "location": "Hyderabad",
  "availability": true, "skills": [], "education": [], "certificates": [], "showcase": [], "services": [] }
```

17.2 My Share Metadata

```
GET /api/v1/portfolio/me/share
```

Authentication required. Returns the authenticated student's public profile URL and share metadata.

Recommended response:

```
{ "slug": "vivek-rao", "profileUrl": "https://studen.app/u/vivek-rao", "cardDownloadUrl": null }
```

17.3 Public Slug Rules

- Slug must be unique.
- Slug should be URL-safe.
- Slug must not expose internal database IDs.
- Changing a slug should be treated carefully because external links may already exist.
- Only public profile fields may be returned.
- A public profile must never expose authentication/security data.

17.4 Profile Card

V1.0 supports a downloadable profile card. The card contains the student's name, headline/service identity, selected public skill highlights, optional public location, StuDen branding and public profile URL.

V1.0 does not require a card customization/editor system.

17.5 Sharing

- Copy profile URL.
- Download profile card.
- Use native browser/device sharing where supported.
- Provide convenient LinkedIn/WhatsApp sharing where technically supported.
- For platforms without a direct-share mechanism, provide URL copy and card download.

18. Standard Error Response

```
{ "timestamp": "2026-08-08T10:30:00Z", "status": 400, "error": "VALIDATION_ERROR", "message": "Invalid request", "path": "/api/v1/services" }
```

Standard codes: 200 successful, 201 created, 204 no content, 400 invalid request, 401 unauthenticated, 403 unauthorized, 404 not found, 409 conflict, 422 validation/business rule failure, 500 server error.

19. Authorization Rules

- Every user can edit their own profile, request services, save services, message and report users/services.
- Users with a StudentPortfolio can manage their portfolio, skills, showcase and services.
- Users can only accept/decline requests for their own services.
- Users cannot edit another user's profile, portfolio, service, showcase or credentials.
- Admin-only APIs require admin authorization.
- Public profile endpoints are read-only and expose only public information.

20. V1.0 Exclusions

- Payments
- Commissions
- Orders
- Payouts
- Wallet
- Escrow

- Reviews
- Ratings
- Subscriptions
- Ads
- AI services
- Advanced profile-card editor/customization

21. API Design Rules

- Use RESTful resource names and plural collection resources.
- Use HTTP status codes consistently.
- Use DTOs rather than returning JPA entities directly.
- Authenticate and authorize on the backend.
- Never trust frontend ownership claims.
- Validate all request bodies server-side.
- Use UUIDs/internal IDs for database entities; use a separate public slug for public profile URLs.
- Never expose password hashes or secrets.
- Keep V2 functionality out of V1 endpoints.

22. User Model

StuDen has one User entity. A single User can be both requester and provider. There is no BuyerProfile, SellerProfile or role-switching account.

23. V1 Core Flows

Requesting: Register → Explore → Search → View Service → View Student Profile/Showcase → Send Booking Request → Accept/Decline → Messages → Complete.

Offering: Become a Freelancer → Student Portfolio → Select Categories → Select Skills → Upload Showcase → Create Service → Publish.

Sharing: Create Student Portfolio → StuDen generates public slug/profile → Share link or download profile card → External viewers visit public profile.

24. Version Status

Version 1.1 — Updated V1.0 API Contract. Added the public shareable Student Profile and profile-card sharing requirements. The ERD should add a publicSlug field to StudentPortfolio if it is not already represented.
